NON-REBREATHING SYSTEMS

For nearly 50 years, A.M. Bickford's veterinary anesthesia equipment and supplies have built a reputation of quality, safety, durability, and trust. Non-rebreathing systems are designed for small animal patients - up to 10 pounds of body weight. Because non-rebreathing systems are connected directly to the anesthetic vaporizer, they are an extension of the vaporizer to your patient. The integrity of your equipment and system depends on them. A.M. Bickford's PC-2 non-rebreathing products are reliable, convenient and designed for you, and your patients' safety.

BREATHING BAGS

Veterinary anesthesia breathing bags are a critical component to your anesthesia machine. Breathing bags provide a visual monitor of the patient's breathing, protect patients from excessive pressure, and hold a collection of respiratory gases used during spontaneous breathing.

Our reusable latex breathing bags are reliable, convenient, designed for you and your patients' safety.

Available in 0.5 Liter and 1 Liter sizes, and equipped with a standard 7/8" bushing neck. Available with, or without, PC-2 valve and tube terminal.

With PC-2 Valve

#80111 0.5 Liter
#80110 1.0 Liter

Without PC-2 Valve

Punched hole in center of bag for easy installation of PC-2 valve.

#18910 0.5 Liter
#18711 1.0 Liter

WASTE GAS DISPOSAL

For nearly 50 years, A.M. Bickford's veterinary anesthesia equipment & supplies have built a reputation of quality, safety, durability, and trust.

Veterinary anesthesia equipment is a direct extension of the anesthesia machine to your patient. The integrity of your equipment & system depends on them. A.M. Bickford's breathing circuit products are reliable, convenient and designed for you, and your patients' safety.
